From Our Philosophy:

We will provide an environment that is safe, nurturing and stimulating for young children

We will show God's love to each child and family unit who comes through our doors.

Our program will be based on the early childhood education philosophy of learning through play that will enhance all areas of development.

We will implement both early childhood and biblical themes to provide a focus for our learning.

We will work with the parents/guardians realizing that they are the primary caregivers.

We will pray for all children and their families in the daycare center.

What We Offer:

Early Childhood Educators who will ensure each child receives love, attention and the assistance they need for optimal growth and development.

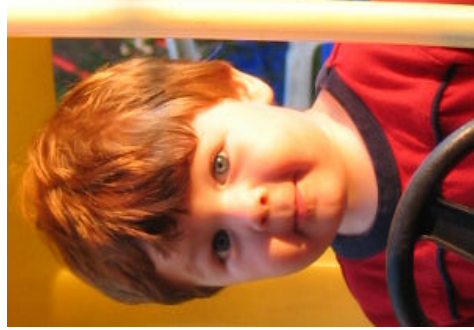

Bright, cheerful rooms.

Bible and Early Childhood Themes that are carefully planned using age appropriate learning centers.

Classrooms specially designed and equipped for children.
